BOUTIQUE

BioMin Toothpaste

DESIGNED FOR MORE COMFORTABLE AND PROLONGED WHITENING

REDUCE SENSITIVITY

GET WHITER TEETH FOR LONGER

THE PATENTED BIOMIN TOOTHPASTE FROM BOUTIQUE IS A REVOLUTIONARY CONCEPT. IT CONTAINS A BIO-ENGINEERED GLASS MATRIX FILLED WITH MINERAL IONS - BIOGLASS! BIOGLASS RELEASES CALCIUM, PHOSPHATE AND FLUORIDE IONS AS IT DISSOLVES, TO STRENGTHEN THE ENAMEL LAYER OF THE TEETH.

HOW DOES BIOMIN WORK?

When you brush with BioMin, the bioglass bonds to your teeth and releases minerals over the following 12 hours. This process remineralises and protects the teeth, making them ten times more resistant to acid attack, and reduces sensitivity.

THE BENEFITS OF BOUTIQUE BIOMIN TOOTHPASTE

- Halt the effects of early tooth decay.
- Decrease Sensitivity.
- Prolong the effects of tooth whitening.

HOW TO USE BIOMIN

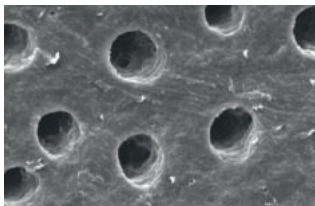

- Use morning and night for 2 weeks, prior to, and throughout, the teeth whitening process.
- BioMin can be used in place of your normal toothpaste going forward.
- You can buy Boutique BioMin Toothpaste from your dental practice.

Boutique BioMin Toothpaste.

PRIOR TO BRUSHING
Open tubules in the tooth

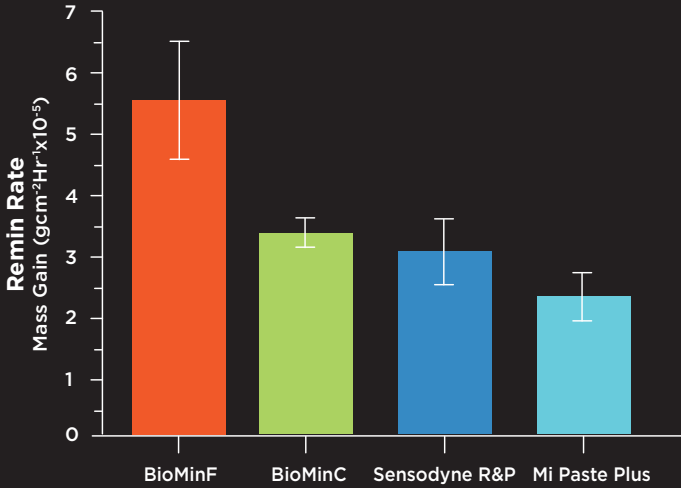

AFTER BRUSHING
Surface is sealed with the minerals

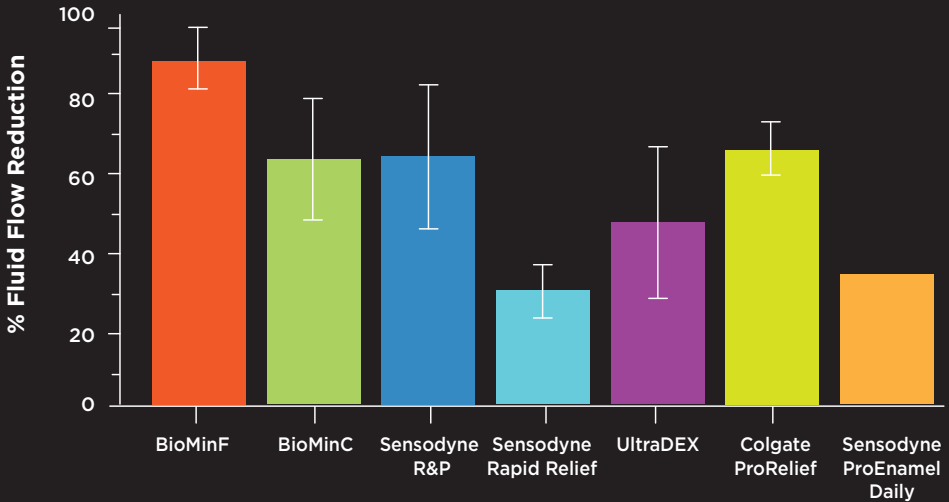

The surface remains sealed

EVIDENCE TO SHOW THE EFFECTS OF BOUTIQUE BIOMIN TOOTHPASTE

BioMin has been clinically proven to remineralise and repair the surface of the teeth better than other leading brands.

Studies also show that BioMin has also been shown to reduce the fluid movement inside the teeth which helps to reduce sensitivity.
