THE DENTAL
SOLUTIONS
COMPANY™

 **Dentsply
Sirona**

Welcome to the latest in news products, special offers and exclusive promotions from Dentsply Sirona

This quarter you can read about ProTaper GOLD, the latest addition to the ProTaper family, enter a whole new world of rapid fluoride release with NUPRO White Varnish and find a solution to good contact creation (the most frequently quoted challenge around Class II restorations) with the Palodent V3 sectional matrix system. Plus, a range of fantastic promotional offers available from 1st July to 30th September 2016*.

Call our dedicated FREEPHONE order line on **1 800 936525** to place your order or if you have a product query. You can also find out more about the Dentsply Sirona family of products, from preventive to implants, restoratives to orthodontics at www.dentsply.com/en-uk

Preventive by Dentsply Sirona

NUPRO® 5% White Varnish promotes rapid fluoride release causing fast and effective relief from hypersensitivity. Applied with a brush in a thin layer, the fluoride varnish provides a highly concentrated temporary dose of fluoride to the tooth surface by sealing dentinal tubules. **It even works on wet teeth as it sets on contact with saliva!**

NUPRO White Varnish is formulated with a hydrogenated resin and urethane resin comprising 5% sodium fluoride at 22600 ppm. An independent test has also showed that NUPRO White Varnish had greater fluoride uptake vs. Colgate® Duraphat® Varnish and in the case of VOCO Profluorid® Varnish, up to 130% more fluoride uptake into lesioned enamel**.

Order 2 Illuminé Starter Kits and get a 3rd FREE

Use promo code: WTETH

Restoratives by Dentsply Sirona

70% of clinicians find contact creation to be the most challenging part of a Class II restoration*. That's why we introduced Palodent®, the very first sectional matrix system that led the market for two decades. Today, the heritage continues with the **Palodent V3 Sectional Matrix System**. It is designed to give clinicians the tools to build a strong foundation for Class II restorations.

Accurate contacts and tight seals

Nickel titanium rings offer consistent separation force on molars and premolars, securing the anatomically shaped matrices against the preparation for a predictable, accurate contact every time.

Increased efficiency

The Palodent V3 system components work together to seal and shape the restoration, minimizing flash and time spent finishing. The system can be configured for multiple restorations at once, and the WedgeGuard provides added efficiency by protecting the adjacent tooth.

Palodent® V3 Sectional Matrix System designed by triodent™

Order an SDR Eco-Refill and get a FREE ceramx universal refill

Use promo code: ECOX

* Offers end 30th September 2016. See website for full terms and conditions

Endodontics by Dentsply Sirona

PROTAPER[®]•GOLD[™]

Same winning technique with greater flexibility

ProTaper GOLD is an upgrade from ProTaper Universal[®] and is designed specifically for ProTaper Universal users who do not want to change their technique but would benefit from the increased safety delivered by the latest developments in metallurgy - GOLD proprietary processing.

ProTaper GOLD keeps the same philosophy as the first generation of ProTaper (file sequence, file sizes, motor settings, obturation methods) with strong additional benefits like increased flexibility (24% on average) and

greater resistance to cyclic fatigue (2.6 times greater on an F3 finishing file).

The ProTaper GOLD file system is now available and will replace the current ProTaper Universal file system, which will be discontinued on 1st October 2016.

"ProTaper GOLD produces consistently predictable shapes for predictable cleaning and obturation that is easier and safer than ever before."

Dr. John West

July - September Endodontics offers*

WaveOne[®] Gold / ProTaper Next[®]

- NiTi endodontic shaping instruments providing flexible performance and outstanding cutting efficiency.
