"I use a range of NSK handpieces, and in particular the NSK Z900L air turbine. The LED optics are exceptional and the Z900L takes my restorative work to a new level as it delivers a powerful and responsive performance and best of all, it is unbelievably quiet, which my patients love. I would definitely find it difficult to work without it!"

Alina Sheikh BDS, Principal Dentist at Enhance Dental Care, East Kilbride
www.enhancedentalek.co.uk

Ti-Max X450L

- Titanium body with scratch-resistant DURACOAT®
- 45-degree angled head
- Cellular glass optics • Triple water jet

RRP €1,015

21W of Cutting Power

NSK's original twin-nozzle head fully transmits the power of the air turbine to the X450's rotor, generating the high torque needed for powerful, consistent cutting.

Superior Accessibility

The 45-degree angled head offers excellent accessibility and visibility during root separation procedures and the removal of hard tissue covering impacted third molars.

"We purchased an NSK iCare to ensure effective cleaning and lubrication of our handpieces prior to autoclaving. The iCare has proven to be invaluable, it's easy to use and I am convinced it is prolonging the life of our handpieces."

Alison Hallisey, Managing Director and owner of Edgeley Dental Practice, Stockport

AUTOCLAVES

iClave plus

- 50% more sterilisation space than a conventional stainless steel chamber of the same size
- Copper chamber minimises internal temperature fluctuations
- Super fast cycle as quick as 18 min, including drying
- Unit size: H428 x W445 x D532mm, chamber 18L

RRP €5,940

iClave HP

- Full vacuum B-cycle in just 18 min
- Fast cycle as quick as 12 min
- Unit size: H254 x W443 x D545mm, chamber 4.5L

RRP €5,940

iClave

- Cost-effective: Copper chamber retains heat longer than stainless steel and the chamber design allows 20% more capacity
- Quick cycles: Vacuum cycle, or a fast cycle in less than 20 min, including drying
- Unit size: H428 x W443 x D652mm, chamber 18L

RRP €5,940

"The NSK iClave was recommended to us and we now have four in the practice - they've been great. We use the fast cycle a lot, as we are a big practice, and the large chamber allows us to autoclave up to four trays at a time. We would highly recommend the NSK iClave, it's excellent and very easy to use."

Liz Madden, Dental Nurse, Abbeyglebe Dental Practice, Donegal

iClave mini

RRP €2,970

- Portable S-type autoclave weighing only 15.5kg
- 12 min cycle for up to 12 handpieces, or up to 6 wrapped for 30min
- Unit size: H360 x W210 x D320mm, chamber 2.5L

"I use the Perio-Mate routinely as it is ergonomically designed, lightweight and offers very good balance in my hand, additionally I like the disposable tips as they reduce maintenance. Perio-Mate, with its ultra-fine water spray and glycine-based powder, is part of my standard implant maintenance protocol for mucositis and early peri-implantitis as it delivers excellent results and patients find the procedure surprisingly painless and the taste rather pleasant."

Dr. Chong Lim. BDS, MSc, MSc, Implantologist & Specialist Periodontist, Perio & Implant Dental Clinic Referral, Twickenham, London, www.perionimplant.com

Varios Combi Pro

Two oral care systems in one!

The NSK Varios Combi Pro brings together advanced ultrasonic solutions and air polishing in one unit to deliver more effective and comfortable oral hygiene and biofilm control.

The ultrasonic device incorporates the advanced NSK iPiezo engine® which easily and comfortably removes both soft and hard calculus by powering the tip according to the applied pressure. Additionally, the unit features state-of-the-art software to maximise

performance while minimising patient discomfort. NSK have considered every facet in the development of the Varios Combi Pro to ensure stable scaling performance. The power delivery to the tip is controlled according to the pressure applied by the operator so it behaves like a hand instrument, and the auto tuning automatically adjusts the oscillation frequency to deliver the desired power to the tip. The tip adheres precisely to the tooth surface, enabling the operator to properly sense the surface condition. All of this is delivered via an ultra-slim, lightweight and well-balanced handpiece which offers outstanding accessibility, freedom of movement and a wide operative field. NSK also offer an extensive range of over 80 tips to optimise treatment in different clinical procedures.

A new take on prophylaxis

The supragingival air polisher incorporated in to the Varios Combi Pro has been designed to be extremely comfortable to hold. It is lightweight and compact and delivers optimised powder

flows inside the chamber, streamlining sprays of powder, water and air to significantly shorten chair times.

The slim handpiece provides excellent accessibility and mobility inside the oral cavity with the long, compact nozzle providing easier access to molars, reducing discomfort for both the operator and patients by eliminating unnecessary lip and cheek stretching while maintaining a wide operative field. The Varios Combi Pro cleans teeth quickly with NSK's FLASH pearl®, a fine spherical shaped calcium-based powder which removes stains and plaque to give a thorough deep clean.

Subgingival applications

The Varios Combi Pro can also be easily used for subgingival applications as the operator simply attaches the relevant powder chamber and the unit automatically selects the functions for supragingival or subgingival applications, preventing selection errors. The detachable chamber and handpiece make it possible to easily switch between supragingival and subgingival applications and makes the unit extremely user and maintenance friendly.

No more clogging

By keeping the control unit handpiece and handpiece hose separate, the risk of powder blockages inside the unit has been completely eliminated. Additionally, the separate chambers, handpieces and handpiece hoses for supragingival and subgingival procedures eliminates the risk of powder mixing or powder entering the control unit.

NSK Varios Combi Pro

Two systems in one - NSK has successfully combined ultrasonic treatment and air polishing into a single professional treatment unit that streamlines procedures and saves time and space.

- Automatically sets air polisher functions for supragingival or subgingival applications
- Independent unit and chamber for easy switching between applications
- Multi-foot control delivers all key operations
- Optional perio system also available

- Wide range of applications
- Gentle on soft tissue
- Wide choice of tips
- A clear functional display
- Auto-cleaning function
- Easy maintenance
- Space-saving cart available
