Highlight 3: Admira® Fusion

Universal nanohybrid ORMOCER® restorative material

- The worldwide first purely ceramic-based restorative material
- By far the lowest polymerisation shrinkage (1.25 % by volume) and particularly low level of shrinkage stress in comparison to all conventional restorative composites
- Inert, so highly biocompatible and extremely resistant to discolouration
- Meeting highest demands in anterior and posterior regions
- Excellent handling, simple high-lustre polishing procedure coupled with high surface hardness guarantee first-class long-term results
- Compatible with all conventional bonding agents
