AIMS AND OBJECTIVES

- Explain and demonstrate the injection moulding technique for composites
- Discuss step by step technical and clinical processes
- Discuss materials available, alternative techniques and evidence about injectable resin composites
- Compare Digital Vs analogue workflow

LEARNING OUTCOMES

- Save time and provide efficient composites with outstanding anatomy
- Practice the injection moulding technique on typodont models (4 hands-on exercises)
- Watch several videos of all technical and clinical stages

PROGRAMME

09:30 - 10:30	Lecture and videos
10:30 - 11:30	Practical 1: Injectable veneer on a central incisor
11:30 - 12:30	Practical 2: Injectable veneer on a peg lateral
12:30 - 13:30	Lunch
13:30 - 15:00	Practical 3: Inject on 6 anteriors with the alternate tooth technique
15:00 - 16:30	Practical 4: Worn posterior dentition
