Practice

#2/21

1.10.21 - 31.3.22

... warm it

... flow it

... sculpt it

NEW

VisCalor and VisCalor bulk

World's first composite with thermo-viscous-technology

Unique and innovative

By pre-warming, the material is flowable during application and can be sculpted immediately afterwards (thermo-viscous-technology)

Excellent handling

Bubble-free application with a narrow and long cannula

High quality and durable

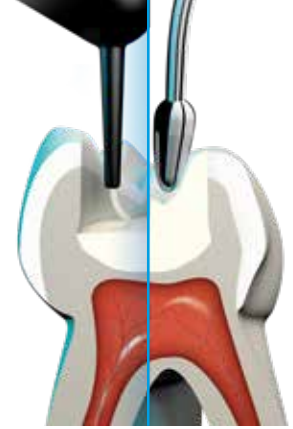

- Optimal flowing to margins and undercut areas
- Excellent physical properties

Efficient

- Combines 2 viscosities in one material ▶ no material change and less stock keeping
- No overlaying necessary

VisCalor® / VisCalor® bulk

THERMOVISCIOUS UNIVERSAL AND BULK-FILL COMPOSITE

For a high-quality restoration, especially in deep and narrow cavities, you usually need materials with different viscosities: a flowable composite as a base material and a packable composite for stability and sculptability. With VisCalor, this is no longer necessary, as it follows a completely new and innovative approach.

Due to the unique thermo-viscous-technology, the material reaches a low viscosity through extraoral warming, allowing for an application that resembles that which you are used to with flowables. The material flows optimally onto cavity walls and undercut regions. Then the material cools down to body temperature quickly, becomes highly viscous and can be modelled like a classic packable composite without any delay.

The very long and narrow cannula allows direct application even in hard-to-reach areas as well as bubble-free application. With a filler content of 83 % by weight as well as very low shrinkage of only 1.4 % by volume, VisCalor is in a class of its own among composite materials.

You have the choice: VisCalor bulk for fillings in the posterior region with increment thicknesses up to 4 mm or the new universal VisCalor for aesthetic restorations also in the anterior region.

BONDING / FILLING MATERIALS

Futurabond® U

Dual-curing universal adhesive

- One bond for all cases – makes all other adhesives in the practice redundant
- Self-etch, selective-etch or total-etch – free choice for the practitioner
- Outstanding versatility of application

Admira® Fusion

Universal nano-hybrid ORMOCER® restorative material

- The worldwide first purely ceramic-based restorative material
- By far the lowest polymerisation shrinkage (1.25 % by vol.) and particularly low level of shrinkage stress in comparison to all conventional restorative composites
- Inert, so excellent biocompatible and extremely resistant to discolouration
- Excellent handling, simple high-lustre polishing procedure coupled with high surface hardness guarantee first-class long-term results

No classic monomers,
no residual monomers!

GrandioSO

Flowables

Don't just go with the flow. Pick the right flow!

Grandio®SO Light Flow

Flowable nano-hybrid restorative material – low viscous

- Precise application thanks to an extra-fine cannula and therefore optimally suitable for hard-to-reach areas and small cavities

REF 2585 Set syringe 5 × 2 g (A1, A2, A3, A3.5, W0), shade guide, accessories

LUTING

Bifix® Hybrid Abutment

Universal, dual-curing luting composite for intraoral and extraoral application

- All-in-one – permanent luting of all known dental materials
- Highest flexibility – intraoral application in the practice and extraoral in the laboratory
- High aesthetic – the perfect masking of dark substrates with highly opaque shades
- With Try-In pastes – precise shade simulation for hybrid abutments, abutment crowns and core treatments

REF 2995 Implant set mixed – matches REF 2410 + 2412 + 2413 (3 × QuickMix syringe 10 g, 3 × Try-In syringe 2.5 g, accessories)

ORAL CARE

Bifluorid 10®

Fluoride varnish for the treatment of dental hypersensitivity

- Immediately desensitising
- Formation of a protective coat against thermal and mechanical influences
- Transparent – no discolouration of teeth
- Special varnish base reinforces long-term effect and deep fluoridation
- Bleaching compatible, reduction of sensitivity, without hindering the bleaching treatment

Ideal for orthodontic therapies and bleaching treatments

VOCO Profluorid® Varnish

Fluoride-containing dental desensitising varnish (5 % NaF)

- Fast desensitisation and fluoride release (5 % NaF \pm 22,600 ppm fluoride)
- Easy to apply – moisture tolerant
- Available in seven pleasant flavours
- Economical application in thin layers, high yield
- Esthetic, tooth-shaded varnish

V-Posil

Precision impression material, VPS

- Highly hydrophilic A-silicone for maximum precision
- Long working time combined with a short intraoral setting time
- Exceptional toughness and recovery after deformation ensure safety during or after removal
- Good hydrophilicity, even after setting, renders pouring and thus the prosthetic restoration perfect
